DRM-KK 75 D

DRM-KK 75-D (Adjustable Armrest & Headrest Ratchet Mechanism)

DRM-KK 75-D (Adjustable Armrest & Headrest Ratchet Mechanism) is a professional adjustment mechanism designed for fully upholstered armrests and upholstered headrests. The mechanism operates from the bottom upward, allowing users to position the armrest or headrest at multiple comfortable angles.

DESCRIPTION

Its indexed ratchet system provides **five locking positions**, reaching a maximum opening angle of **75°**. On the **sixth click**, the locking mechanism automatically releases into the **free position**, allowing the mechanism to return smoothly to its original closed position. This operating principle offers simple, ergonomic and reliable adjustment for both armrests and headrests.

DRM-KK 75-D is an ideal solution for sofas, armchairs and modular seating systems requiring durable, precision-adjustable armrest and headrest mechanisms with long-lasting performance.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.
