DRM-BOM-360D

DRM-BOM-360 (360 mm Adjustable Headrest & Armrest Mechanism)

DRM-BOM-360 (360 mm Adjustable Headrest & Armrest Mechanism) is a professional adjustment mechanism designed for armrests and, more commonly, adjustable headrest cushions used in sofas, lounge furniture and upholstered seating systems. Featuring a 360 mm operating range and a concave movement geometry, it delivers smooth motion, excellent ergonomics and enhanced seating comfort.

DESCRIPTION

Its specially designed mounting brackets simplify installation and improve manufacturing efficiency. The mechanism is suitable for both **wooden and metal furniture frames**. For wooden frame applications, DEREMFIX strongly recommends reinforcing the mounting points with **metal support plates** to maximize structural strength, extend service life and minimize after-sales service requirements.

DRM-BOM-360 is an ideal solution for modern sofas, modular seating systems and premium upholstered furniture, combining easy installation, outstanding durability and smooth ergonomic adjustment.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.
