DRM-BOM D PPD

DRM-D-PP (Bracket-Free Headrest & Armrest Mechanism)

DRM-D-PP (Bracket-Free Headrest & Armrest Mechanism) is a professional adjustment mechanism offering the same technical specifications, operating principle and functionality as the DRM-BOM-360 mechanism. It provides smooth, ergonomic and reliable movement for adjustable armrests and headrests used in modern upholstered furniture.

DESCRIPTION

The only difference between this model and the **DRM-BOM-360** is that it is supplied **without mounting brackets**. This allows furniture manufacturers to use their own mounting systems or develop custom installation solutions that best suit their production methods and furniture designs.

DRM-D-PP is an ideal solution for sofas, armchairs, modular seating systems and custom furniture projects requiring the proven performance of the BOM-360 mechanism with the flexibility of bracket-free installation.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.
