DRM-12 90

DRM-12-90 (12-Position Adjustable Headrest Mechanism)

DRM-12-90 (12-Position Adjustable Headrest Mechanism) is a professional adjustment mechanism developed for adjustable headrests used in sofas, lounge chairs and upholstered seating systems. The mechanism moves smoothly from a 90° starting position to a fully extended 180° resting position, providing a wide range of ergonomic adjustment.

DESCRIPTION

Its **12-position indexed mechanism** advances in precise **7.5-degree increments**, allowing users to select the ideal head support angle for maximum comfort. This fine adjustment system improves neck and head support, making it ideal for premium seating applications.

The **DRM-12-90** has been specifically engineered as a **headrest adjustment mechanism**. It is **not recommended for armrest applications**, as armrests are subject to significantly higher structural loads than headrests.

DRM-12-90 is an ideal solution for modern sofas, recliners and premium upholstered furniture, offering precise multi-position adjustment, ergonomic support and long-lasting performance.
