DRM-SK 210X180 D

DRM-SK 210x280-D (Dismounted Multi-Position Sliding Backrest Mechanism)

DRM-SK 210x280-D (Dismounted Multi-Position Sliding Backrest Mechanism) is a patented professional mechanism developed for adjustable backrest systems used in sofas and upholstered seating. Unlike conventional sliding backrest mechanisms that move in a single action, this advanced design features a 10-position indexed adjustment, allowing the backrest to recline gradually while increasing the seating depth in a smooth and controlled manner.

DESCRIPTION

Each locking position provides enhanced comfort, while the **11th click** automatically releases the mechanism into the **free position**, allowing it to return smoothly to its original position. This operating principle delivers precise adjustment, ease of use and long-term reliability.

A key feature of the **DRM-SK 210x280-D** is its **dismountable back cushion system**. The back cushion can be easily removed and reinstalled, significantly reducing shipping volume, improving storage efficiency and lowering transportation costs. This makes the mechanism especially valuable for furniture manufacturers exporting products worldwide.

Protected by a patented design, **DRM-SK 210x280-D** combines advanced engineering, multi-position comfort, expandable seating depth and optimized logistics, making it an ideal solution for premium sofas and modular seating systems.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.
