DRM-CLPS-17

DRM-CLPS-17

DRM-CLPS-17 (CL17 Clips) are professional upholstery fastening components designed to securely connect zigzag springs to paper covered wire using a pneumatic CL17 clip gun. This system allows all zigzag springs to operate as a synchronized suspension unit, moving simultaneously across the entire seating surface.

DESCRIPTION

The synchronized movement distributes weight evenly, enhances suspension performance and helps cushions maintain their original shape for many years. The result is superior seating comfort, improved ergonomics and extended furniture durability.

DRM-CLPS-17 is widely used in the production of sofas, armchairs, modular seating systems and other upholstered furniture where high-performance seating systems are required.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.

Product specifications, formulations and technical data may be modified without prior notice as part of continuous product development and improvement programs. The latest version of this document supersedes all previous editions.
