DRM-KĞT-KTEL-01

DRM-KGT-KTEL-01

DRM-KGT-KTEL-01 (Paper Covered Wire) is a high-performance upholstery component designed to be used together with DRM-CLPS-17 (CL17 Clips) and DRM-ZGZG-SLNCK-01 (Zigzag Spring Swing Clips). Installed using a pneumatic clip gun, this integrated system enables all zigzag springs to function as a synchronized suspension unit.

DESCRIPTION

By allowing every zigzag spring to move simultaneously across the entire seating surface, Paper Covered Wire distributes weight evenly, significantly improving seating comfort, flexibility and suspension performance. It also helps cushions retain their original shape for extended periods, increasing the durability and service life of upholstered furniture.

DRM-KGT-KTEL-01 is an essential component for manufacturing premium sofas, armchairs, modular seating systems and other upholstered furniture requiring superior seating performance.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.

Product specifications, formulations and technical data may be modified without prior notice as part of continuous product development and improvement programs. The latest version of this document supersedes all previous editions.
