DRM-KDM

DRM-KDM (Seat Rotation Conversion Mechanism)

DRM-KDM (Seat Rotation Conversion Mechanism) is an innovative transformation mechanism designed for sectional sofas, modular seating systems and selected two-seat relaxation sofas. When the seat cushion is pulled forward, the mechanism performs a 90° rotation, transforming the seating configuration into a different functional position.

DESCRIPTION

In sectional sofas, this mechanism allows the seating section to rotate and quickly convert the sofa into a **double bed**, maximizing space utilization and versatility. In two-seat relaxation sofas, it creates a deeper and more comfortable seating or lounging position, significantly enhancing user comfort.

Designed for modern multifunctional furniture, **DRM-KDM** combines smooth operation, innovative engineering and exceptional functionality, making it an ideal solution for manufacturers of modular and convertible furniture.
