DRM-KNC-01

DRM-KNC-01 (Elastic Webbing Hook)

DRM-KNC-01 (Elastic Webbing Hook) is a professional fastening component designed to securely install elastic webbing onto metal profile furniture frames. Unlike conventional stapled or nailed installations, the hook is fitted into a pre-drilled hole in the frame, providing a secure, durable and reliable mounting solution.

DESCRIPTION

This installation method allows the elastic webbing to maintain proper tension, prevents loosening over time and improves the overall durability of the seating system. It also simplifies assembly and supports efficient production in professional upholstery manufacturing.

DRM-KNC-01 is an ideal fastening solution for sofas, office seating, lounge chairs and other upholstered furniture built with metal profile frames requiring secure elastic webbing installation.
