

DRM - BZMKS - 01

DRM-BZMKS-01 (Storage Bed Lifting Mechanism)

DRM-BZMKS-01 (Storage Bed Lifting Mechanism) is a professional lifting mechanism designed to provide smooth, balanced and controlled opening and closing of storage bed bases. It is engineered to operate with gas springs and is compatible with various gas spring force ratings (Newton values) depending on the weight and dimensions of the bed.

DESCRIPTION

The mechanism allows the bed base to open effortlessly while ensuring safe and controlled closing, improving both user comfort and safety. Its durable steel construction provides long-lasting performance and convenient access to the storage compartment.

In addition to the standard version, **DRM-BZMKS-01** is also available in **locking** and **parallel lifting** configurations to meet different furniture designs and application requirements. It is an ideal solution for residential storage beds and professional furniture manufacturing.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.

Product specifications, formulations and technical data may be modified without prior notice as part of continuous product development and improvement programs. The latest version of this document supersedes all previous editions.
