DRM-MG-KS

DRM-MG-KS (Heavy-Duty Recliner Reinforcement Mechanism)

DRM-MG-KS (Heavy-Duty Recliner Reinforcement Mechanism) is a professional reinforcement system developed to enhance the structural strength of recliner mechanisms during both backrest and footrest reclining positions. Designed for demanding applications, it delivers exceptional durability and long-term reliability under high load conditions.

DESCRIPTION

Its reinforced construction provides outstanding resistance to heavy user loads, maintaining the stability of both the backrest and footrest while reducing mechanical stress and extending the service life of the recliner mechanism. By improving overall durability, it also helps manufacturers minimize after-sales service requirements and warranty claims.

DRM-MG-KS is an ideal solution for premium recliners, lounge chairs and heavy-duty seating systems requiring maximum strength, exceptional reliability and long-lasting performance.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.

Product specifications, formulations and technical data may be modified without prior notice as part of continuous product development and improvement programs. The latest version of this document supersedes all previous editions.
