

DRM - BRCLN - LUX

DRM-BRCLN-LUX

DRM-BRCLN-LUX is an innovative backrest mechanism developed for two-seat and three-seat sofas. Mounted inside the rear section of the backrest, the mechanism allows the backrest to rotate completely backward, increasing the seating depth by approximately 200 mm (20 cm) and creating a larger, more comfortable seating area.

DESCRIPTION

The mechanism enables a smooth transition from the standard seating position to a more relaxed configuration, significantly enhancing both comfort and functionality without compromising the furniture's elegant appearance.

DRM-BRCLN-LUX is an ideal solution for contemporary sofas, loveseats and three-seat sofas, offering expanded seating space, improved ergonomics and enhanced comfort for premium furniture collections.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.
