

DRM-BRCLN-ECO

DRM-BRCLN-ECO

DRM-BRCLN-ECO has been developed as a cost-efficient alternative to the DRM-BRCLN-LUX mechanism while delivering the same functionality and user experience. Designed for two-seat and three-seat sofas, it allows the backrest to rotate completely backward, increasing the seating depth by approximately 200 mm (20 cm) to create a larger and more comfortable seating area.

DESCRIPTION

Its optimized design reduces both manufacturing costs and assembly time while maintaining the same ergonomic benefits and functionality as the LUX version. This enables furniture manufacturers to improve production efficiency without compromising comfort or product quality.

DRM-BRCLN-ECO is an ideal backrest mechanism for modern sofas, combining cost optimization, reliable performance and premium seating comfort in a single solution.

DISCLAIMER

The information contained in this Technical Data Sheet is based on laboratory testing, practical experience and current knowledge at the time of publication. The values provided are intended as general guidance and may vary depending on application methods, operating conditions, substrates, environmental factors and production processes.

Since the conditions of use and application are beyond our control, customers are responsible for determining the suitability of the product for their specific application through their own testing and evaluation. The information provided does not constitute a warranty or guarantee of product performance in any particular application.

Product specifications, formulations and technical data may be modified without prior notice as part of continuous product development and improvement programs. The latest version of this document supersedes all previous editions.
