

DRM- LIFTONE - WM

DRM-LIFTONE-WM (Power Lift Recliner Mechanism)

DRM-LIFTONE-WM (Power Lift Recliner Mechanism) is an innovative power lift recliner mechanism developed specifically for users with limited mobility. Using a single electric actuator, it performs both the synchronized reclining function and the power lift assistance, helping users transition safely from a seated position to standing.

DESCRIPTION

The mechanism simultaneously operates the backrest and footrest to provide a comfortable reclining position, while the integrated lift function gently tilts and raises the chair forward to assist the user in standing with minimal physical effort. This feature significantly improves independence and daily comfort for elderly users, people with reduced mobility and individuals undergoing rehabilitation.

Widely used in **healthcare facilities, nursing homes, rehabilitation centers, hospitals and senior living furniture**, **DRM-LIFTONE-WM** combines innovative engineering, safe lifting technology and ergonomic design, making it one of DEREMFIX's most advanced mobility assistance solutions.
